

Educational Support Services and Programs.

School Social Work Services

The district provides School Social Work services to students in need of such support. The School Social Worker, a team member of the Student Assistant Program, attendance team, and PBIS team, meets individually and in group settings with students, conducts home visits as needed, collaborates with building administrators, school counselors, school nurses, and faculty, and networks with community agencies to ensure that students and families are able to receive the specific help that they need.
