

2nd Grade Math Assessment Matrix 2017-2018

*Note: K-2nd Targets will not be assessed.

Unit 1	Unit 2	Unit 3	Unit 4	Unit 5	Unit 6
<p>OA3 (Ch. 1) Determine whether a group of objects (up to 20) has an odd or even number of members, e.g., by pairing objects or counting them by 2s; write an equation to express an even number as a sum of two equal addends.</p>	<p>OA.2 (Ch. 3) Fluently add and subtract within 20 using mental strategies. 2 By end of Grade 2, know from memory all sums of two one-digit numbers.</p>	<p>NBT 5 (Ch. 4,5) *Addition Fluently add and subtract within 100 using strategies based on place value, properties of operations, and/or the relationship between addition and subtraction.</p>	<p>MD 8 (Ch. 7) Solve word problems involving combinations of dollar bills, quarters, dimes, nickels, and pennies, using \$ and ¢ symbols appropriately. Example: If you have 2 dimes and 3 pennies, how many cents do you have?</p>	<p>MD 3 (Ch. 8,9) Estimate lengths using units of inches, feet, centimeters, and meters.</p>	<p>MD 10 (Ch. 10) (Tally Charts and Picture Graphs) Draw a picture graph and a bar graph (with single-unit scale) to represent a data set with up to four categories. Solve simple put-together, take-apart, and compare problems using information presented in a bar graph.</p>
<p>NBT 3 (Ch. 1) Read and write numbers to 1000 using base-ten numerals, number names, and expanded form.</p>	<p>OA.1 (Ch. 3) Use addition and subtraction within 100 to solve one- and two-step word problems involving situations of adding to, taking from, putting together, taking apart, and comparing, with unknowns in all positions, e.g., by using drawings and equations with a symbol for the unknown number to represent the problem.</p>	<p>NBT 5 (Ch. 4,5) *Subtraction Fluently add and subtract within 100 using strategies based on place value, properties of operations, and/or the relationship between addition and subtraction.</p>	<p>MD 7 (Ch. 7) Tell and write time from analog and digital clocks to the nearest five minutes, using a.m. and p.m. Know relationships of time (e.g., minutes in an hour, days in a month, and weeks in a year).</p>	<p>MD 9 (Ch. 8) Generate measurement data by measuring lengths of several objects to the nearest whole unit, or by making repeated measurements of the same object. Show the measurements by making a line plot, where the horizontal scale is marked off in whole-number units.</p>	<p>MD 10 (Ch. 10) (Bar Graphs) Draw a picture graph and a bar graph (with single-unit scale) to represent a data set with up to four categories. Solve simple put-together, take-apart, and compare problems using information presented in a bar graph.</p>
<p>NBT 2 (Ch. 1) Count within 1000; skip-count by 2s, 5s, 10s, and 100s.</p>	<p>NBT 2 (Ch. 3) Count within 1000; skip-count by 2s, 5s, 10s, and 100s.</p>	<p>NBT 6 (Ch. 4) Add up to four two-digit numbers using strategies based on place value and properties of operations.</p>	<p>MD 1 (Ch. 8) (Inches and Feet) Measure the length of an object by selecting and using appropriate tools such as rulers, yardsticks, meter sticks, and measuring tapes. MD 2 (Ch.8) (Inches and Feet) Measure the length of an object twice, using length units of different lengths for the two measurements; describe how the two measurements relate to the size of the unit chosen.</p>	<p>MD 1 (Ch.9) (Centimeters and Meters) Measure the length of an object by selecting and using appropriate tools such as rulers, yardsticks, meter sticks, and measuring tapes.</p>	<p>G1 (Ch. 11) Recognize and draw shapes having specified attributes, such as a given number of angles or a given number of equal faces. Identify triangles, quadrilaterals, pentagons, hexagons, and cubes.</p>
<p>NBT 1a,b (Ch. 2) Understand that the three digits of a three-digit number represent amounts of hundreds, tens, and ones; e.g., 706 equals 7 hundreds, 0 tens, and 6 ones. Understand the following as special cases: 100 can be thought of as a bundle of ten tens — called a “hundred.” The numbers 100, 200, 300, 400, 500, 600, 700, 800, 900 refer to one, two, three, four, five, six, seven, eight, or nine hundreds (and 0 tens and 0 ones).</p>	<p>OA 4 (Ch. 3) Use addition to find the total number of objects arranged in rectangular arrays with up to 5 rows and up to 5 columns; write an equation to express the total as a sum of equal addends.</p>	<p>NBT 7 (Ch. 6) Add and subtract within 1000, using concrete models or drawings and strategies based on place value, properties of operations, and/or the relationship between addition and subtraction; relate the strategy to a written method. Understand that in adding or subtracting three-digit numbers, one adds or subtracts hundreds and hundreds, tens and tens, ones and ones; and sometimes it is necessary to compose or decompose tens or hundreds.</p>	<p>MD 2 (Ch.8) (Inches and Feet) Measure the length of an object twice, using length units of different lengths for the two measurements; describe how the two measurements relate to the size of the unit chosen.</p>	<p>MD 2,4 (Ch. 9) (Centimeters and Meters) Measure the length of an object twice, using length units of different lengths for the two measurements; describe how the two measurements relate to the size of the unit chosen. Measure to determine how much longer one object is than another, expressing the length difference in terms of a standard length unit.</p>	<p>G2 (Ch. 11) Partition a rectangle into rows and columns of same-size squares and count to find the total number of them.</p>
<p>NBT 8,4 (Ch. 2) Mentally add 10 or 100 to a given number 100–900, and mentally subtract 10 or 100 from a given number 100–900. Compare two three-digit numbers based on meanings of the hundreds, tens, and ones digits, using >, =, and < symbols to record the results of comparisons.</p>	<p>NBT 8,4 (Ch. 2) Mentally add 10 or 100 to a given number 100–900, and mentally subtract 10 or 100 from a given number 100–900. Compare two three-digit numbers based on meanings of the hundreds, tens, and ones digits, using >, =, and < symbols to record the results of comparisons.</p>	<p>NBT 9 (Ch. 4,6) Explain why addition and subtraction strategies work, using place value and the properties of operations</p>	<p>MD 5,6 (Ch. 8) (Inches and Feet) Use addition and subtraction within 100 to solve word problems involving lengths that are given in the same units, e.g., by using drawings (such as drawings of rulers) and equations with a symbol for the unknown number to represent the problem. Represent whole numbers as lengths from 0 on a number line diagram with equally spaced points corresponding to the numbers 0, 1, 2, ..., and represent whole- number sums and differences within 100 on a number line diagram.</p>	<p>MD 5,6 (Ch. 9) (Centimeters and Meters) Use addition and subtraction within 100 to solve word problems involving lengths that are given in the same units, e.g., by using drawings (such as drawings of rulers) and equations with a symbol for the unknown number to represent the problem. Represent whole numbers as lengths from 0 on a number line diagram with equally spaced points corresponding to the numbers 0, 1, 2... and represent whole- number sums and differences within 100 on a number line diagram.</p>	<p>G3 (Ch. 11) Partition circles and rectangles into two, three, or four equal shares, describe the shares using the words halves, thirds, half of, a third of, etc., and describe the whole as two halves, three thirds, four fourths. Recognize that equal shares of identical wholes need not have the same shape.</p>
