

5850.1 - Board Statement of Pre-Graduation Activities

The Board of Education is committed to promoting the health and safety of all students in the district at all times. However, it is especially concerned with the sharp increase in drug and alcohol related incidents that have historically occurred during the week preceding graduation. Therefore, it supports the administration in its efforts to establish a schedule of pre-graduation activities (including mandatory graduation rehearsals) that will encourage responsible and healthy student behavior.

The Board also wishes to express its appreciation of the various school-based parent groups who have worked arduously to provide our students with enriching experiences throughout their last year of high school.

Adopted: 16 June 1999
