

Anti-Bullying Task Force

Vision and Goal

Through education, prevention and early intervention, the Anti-Bullying Task Force strives to eliminate bullying to create a culture of mutual respect and a safe environment for all. Our district, schools, families and communities will work together to establish guidelines for the identification, reporting and consequences of bullying. CCUSD supports a culture in which all stakeholders are treated fairly and feel safe, respected and empowered.

We are committed to providing students with a safe and nurturing environment to ensure optimum teaching and learning. CCUSD has character education, an anti-drug/anti-violence curriculum, and other programs to promote civility and a positive social environment within the school community.

In keeping with this initiative, the Superintendent has formed the Anti-Bullying Task Force, charged with making recommendations to reduce or eliminate bullying of students and staff within the District. The Task Force is composed of students, parents, teachers, administrators and community members, and began meeting in October of 2008.
