The math program is designed to meet the needs of each student. Some will review and practice the topics presented during the past school year, while others will be challenged by new topics. For each, the daily work will be varied, incorporating technology, projects, manipulatives, and traditional textbook work.

### Developmental and Enrichment Reading/Language Arts

The English program will be tailored to the needs of each student. Students will work on improving their vocabulary, reading comprehension, grammar, and writing. To enrich their knowledge, the students will face challenges in writing strategies, critical thinking, and analysis.

Students will attend four classes each day with a break for recess. Most will take two English and two math sessions daily, although this can be modified for those who need extra work in either.

Please provide a nutritious snack and drink every day. If your child is participating in [Mission Organization](#) in the afternoon, please provide lunch. Students should wear sneakers and comfortable clothes so they can enjoy a short play time in the gym.
