Audio Video Television & Film (AVTF)

It's true: Georgia has become the number one filming location in the world, according to FilmL.A., an organization that provides licenses to movie and television companies in Los Angeles.

In 2017, Georgia Governor Nathan Deal said TV and movie productions generated \$9.5 billion dollars for Georgia's economy. More than 320 film and TV productions were shot in Georgia, including Netflix' Stranger Things and AMC'S The Walking Dead. Governor Deal says the industry continues to generate jobs in TV and movie productions.

The Audio Video Television & Film (AVTF) Pathway at the Bartow County College & Career Academy is responding to the industry's need for production employees. We prepare students for further AVTF education in post-secondary schools and in some cases, our students have been able to land jobs on various commercial 'shoots.'

We teach students basic camera shots, lighting and sound techniques, how to prepare for a shoot, how to edit video, and how to effectively engage with clients. Over the years, our students have worked on videos for the Cartersville Bartow County Office of Economic Development, The Booth Western Art Museum, local individuals, and a couple of independent production companies.
