

# Boyd ISD Student Personal Device Acceptable Use Policy

## 2015-2016 School Year

Boyd ISD's mission to provide your child a 21st century learning environment and to better prepare them for the global community requires the use of today's best technology. All Boyd ISD iPads and computers are loaded with the latest softwares, apps, and are ready to connect to our wireless network. They are also configured to go through our web content filter no matter the location of your child.

With that stated, your child can choose to use their own personal device. Boyd ISD reserves the right to require profile restrictions to be installed on personal devices if it is deemed necessary to accomplish the educational mission of the campus. Students are allowed **one device** to be connected to the Boyd ISD network wi-fi.

All student devices must have the required instructional apps downloaded. The student is responsible for purchasing the required apps. All students are required to take their device to the librarian to connect to our student wi-fi.

### Responsible Use:

- You must comply with the [Boyd ISD Responsible Technology Use Guidelines](#).
- You must connect to the student wi-fi.
- Record the serial number of your device at home.
- Devices will be brought to school charged each and every day.
- Set a password on your device.
- Students are responsible for lost, stolen, or damaged devices. Boyd ISD will not be held responsible for lost or damaged personally owned devices.
- Student owned devices are subject to the same guidelines as the school owned devices.
- Do not share or loan your personal device.
