

Vallivue School District 139

The Idaho Legislature requires that all public schools with 9th grade and above be accredited through the Northwest Association of Accredited Schools (NAAS). To comply with NAAS Standard, the following school in Vallivue School District will obtain accreditation by meeting the Northwest Accreditation Standards.

1. Vallivue High School
2. Vallivue Academy

The State Board of Education has determined that Northwest Accreditation Standards are an acceptable method of obtaining accreditation. The board of trustees believes that accreditation through these standards will allow schools in this district to provide a thorough education for all students, achieve the mission and goals of the district, and allow flexibility in implementing educational programs.

The Idaho Department of Education requires that schools accredited under the Northwest Accreditation Standards annually submit the Northwest Accreditation report.

The school principals, with assistance from the superintendent or assistant superintendent, will complete the annual accreditation reports and submit a copy to NAAS.

It is the goal of Vallivue School District to receive “exemplary school” or “approved” rating on the annual accreditation for each high school in the district. The board of trustees will receive annual reports regarding the ratings received by the high school(s). If any high school in this district receives “approved with warning” or “not approved” rating the board of trustees will oversee the implementation of remedial steps to obtain “exemplary” or “approved” ratings.
