RE: **The Annual Statement of the Management Plan for Asbestos
Insulation Products in the Schools of the Archdiocese of Detroit**

St. Mary Catholic School has had asbestos management plans prepared for our school building. These plans are available for your inspection Monday through Friday during normal school hours at the School Office.

In May 2016, a Periodic Surveillance/Inspection was conducted at the school for the condition of asbestos. **I am pleased to report that St. Mary School passed all required asbestos inspections.** Accredited inspectors not only checked the condition of asbestos, but reassessed operations and maintenance procedures that will keep this material in good condition.

If you have any further questions, you may contact the maintenance department at the school.

Sincerely,

Kathy J. Sparks
Principal
