

Arthur Academy Moby Max Math Challenge

Practice for Pride & Prizes!

All Arthur Academy students are invited to participate in our Moby Max Math Challenge!

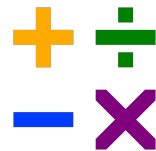

This first challenge runs from February 1st-28th!

When students login to their Moby Max accounts to practice math, the program will automatically log the practice minutes.

Students who meet the monthly practice goal earn a prize!

Kinder: 50min/wk = 200 minutes
1st Grade: 60 min/wk = 240 minutes
2nd Grade: 70 min/wk = 280 minutes
3rd-6th Grades: 80 min/wk = 320 minutes

Each AA grade level will be competing for their class' trophy.
Which AA school will win the Kindergarten trophy?
Which will win the 1st, 2nd, 3rd, 4th, 5th, and 6th grade trophies?

The AA school with the highest average number of minutes per student will earn a prize and be presented the Moby Max Math School Challenge trophy by Ms. Walker at an upcoming assembly.

Why Moby Max? It's a great way for students to practice math problems tailored to their level. It also gives our students an opportunity to work with different types of math problems.
