RE: Title III Allocations

Title III Allocations Report for 2013-2014 School Year

The total allocation for the 2013-2014 school year is \$86,946.00

Title III money is used to support the English Learner (EL) to become fluent in English and at grade level in their content subjects. Money for this program is to support programs that will achieve this goal. Money goes to the school sites and each site will determine how they will spend their money through their School Site Council (SSC). The decisions made by SSC will be reflected in their Single Plan for Student Achievement (SPSA). Sites have many options on how they can spend the money which can include, but is not limited to, support materials for the core program, staff development, parent training and additional personnel to work with EL students.
