Middle & High School Health Services

Dear Parent/Guardian,

Welcome to the Chestnut Ridge District. We look forward to working with you in order to provide the highest level of health care possible for your child.

The attached forms will provide us with important information regarding your child's medical, history and health needs while also providing you with information about state mandated health services and school policies influencing your child's well-being. Please complete these forms as accurately and completely as possible.

Return these completed forms and your child's immunization record to the school building your child is registering in so that we may review them and answer any questions you may have. **A complete and current immunization record must be reviewed by one of the nurses prior to your child's first day of school.**

For students in the 6th and 11th grade, the *School Health Act* requires each child to have a physical exam. Students in 7th grade are required to have a dental exam according to the *School Health Act*. We feel it is best to have these exams done by your child's doctor and dentist.

In addition to the physical and dental exams, each child will be screened annually for height, weight, and vision. Yearly hearing screenings are done in grades 7 and 11.

If you have a questions or concerns, please feel free to call at 839-4195, extension 3338 at the high school or 839-4195 extension 2508 at the middle school

Sincerely,

Denise A Barkman R.N., C.S.N.
High School

Sharron Gordon R.N., C.S.N.
Middle School
