

Bring Your Own Device (BYOD) allows students to use a personal technology device on the campus WiFi network. The purpose of this program is to allow students greater access to technology and learning resources on campus.

- Prior to participating, *both students and parents should review the “BYOD Responsible Use Guidelines” document* which is available at [http://www.pvpusd.k12.ca.us/images/uploads/BYOD\\_form.pdf](http://www.pvpusd.k12.ca.us/images/uploads/BYOD_form.pdf)
- There are no separate forms to be signed and returned as all students agreed to abide by District’s **Acceptable Use of Electronic Resources** policy during Registration.
- At school, students will create a campus network account with a unique username, password and security questions in order to register a personal device on the campus WiFi network. This process will be done on campus.

After these steps have been completed, students will be able to register a personal device for WiFi access.

## FAQs

### **Is this a requirement?**

No, students are not required to bring or use their own technology device at school.

### **What rules or guidelines must a student comply with?**

This information is available in the “BYOD Responsible Use Guidelines” document which parents and students should read and understand.

### **What types of devices can a student use?**

Smartphone, tablet, laptop, e-Reader (devices with WiFi capability that can be used for academic learning purposes). Laptops will require an up to date anti-virus program.

### **Where and when can a student use a personal technology device?**

There is WiFi coverage throughout the school campus during school hours. Devices may be used before school and at lunch. Classroom use is at the discretion of the teacher. All classroom and campus rules must be followed as well as the “Responsible Use Guidelines.”

### **What if a personal device is damaged, broken, lost or stolen at school?**

Students bring personal technology devices at their own risk. The PVPUSD will not be held responsible.

### **What is the setup process?**

Students will need to register their personal device with their own username and password. Prior to setting up a personal device, students will be required to create their own network account on a district computer. Account setup information will be provided to students. Students will have a unique login and password that should not be shared with other students. Students will also setup password recovery security questions to help assist them if they forget or need to change their password.

**Will students receive assistance accessing the campus network?**

Yes, staff will be able to assist students.

**Will staff provide hardware & technical support?**

Staff will be able to assist students with the process of registering a device and accessing the campus WiFi network. Staff will not troubleshoot, diagnose or repair software or hardware issues on personal devices.

**Will the Internet service be filtered?**

Yes, service will be content filtered.
