Tip

Kids should see the dentist for the first time by age 1.

North East Medical Services (NEMS) has been providing quality and comprehensive services to the community for more than 40 years.

Every step of the NEMS dental experience has been designed to deliver fun and caring services to children, while providing comfort and peace of mind to their parents. Our team takes great pride in delivering high quality, accessible, and compassionate oral health care.

Did You Know?

- Cavities (dental caries) are the most common chronic childhood disease.
 - 5 times more common than asthma
 - 7 times more common than hay fever
- Cavities are a significant problem for school aged children.
- Twenty-nine percent (29%) of all kindergarten children have untreated dental caries.
- The problem is greater for the low-income and racial-ethnic minorities.
