College and Career Planning

Sometimes figuring out what you want to do after high school can be challenging. Here are a few questions you can ask yourself to find the answers.

1. Of whom are you jealous?

Identifying people of whom you're jealous, and which specific aspects of their work or life you wish you had for yourself, can help you determine the specific components of a job or life that you want.

2. Who are your top three role models?

Who are your role models? Why? What are the common threads? This can help you identify your core values. And values are always part of your passion.

3. What's a special gift that you have that is unique to you?

Have you ever won an award, even a weird or silly one? What for? Is there a fun trick you can do? What is it? Do you have special talent for connecting with babies? Dog or cats? Butterflies? The elderly? Don't stop at one gift - keep it going until you've got a list of 10.

4. Ask your three closest friends what makes you special.

Are you funny, wild, dependable and/or reliable? Are you a hilarious comedian and gifted storyteller? Match these answers to the special gifts you identified in the previous question. How do these qualities make you *you*?

5. If you could get paid to volunteer, how would you use that time?

Would you work with animals, kids, the elderly, veterans, or the homeless? Would you volunteer to play music for babies in the NICU or build houses for Habitat for Humanity or teach English as a second language? The way you choose to use your skills and time can tell you a lot about where your passions are.
